

Job Opportunity: Product Engineer at COOSHA Impact Venture

Join our team at an exciting early stage, where your role will involve contributing across multiple functions to ensure the successful delivery of existing projects while collaborating with the management team to drive growth. Our innovative products will be implemented in international initiatives, with a primary focus on Sub-Saharan Africa.

As **Product Engineer**, you will be the foundational member of our technology team, leading the development of cutting-edge solutions across our product portfolio and overseeing their implementation within these projects. Initially, your role will encompass broader responsibilities to support immediate needs and ensure seamless execution, evolving over time into a more focused, long-term scope as the team grows.

This position serves as the cornerstone of our technology team, guiding the development of both the team and the products, and leading projects from concept to completion.

Key Responsibilities

- **Product Development / Product Management:** Design and develop “productised” low-pressure hydrogen storage solutions for various installation sizes.
- **Solution delivery:** Oversee budgets, timelines, and delivery to key clients.
- **Supply Chain Management:** Establish and maintain supplier relationships.
- **Stakeholder Management:** Coordinate with internal teams, vendors, and clients to ensure seamless project execution.
- **Business Growth:** Align products and solutions with market demands and company objectives.

Your Profile

- A degree in engineering (bio-engineering, civil, industrial, or equivalent) with experience in product development for gas handling, piping, or storage solutions.
- Demonstrable relevant work experience in a similar role.
- Independence and flexibility to thrive in a fast-paced, start-up environment.
- Strong project management skills, including budget control, cost management, and on-time delivery.
- Excellent stakeholder engagement and vendor negotiation capabilities.
- Experience in international environments, particularly in developing regions.
- Proficiency in English and French; additional languages are a plus.
- Knowledge of renewable energy or hydrogen technologies is advantageous.
- Willingness to travel from time to time to COOSHA project sites.

What We Offer

- Competitive salary depending on relevant experience and benefits (negotiable).
- Flexible working arrangements (location & working hours).

How to Apply

Please send your CV along with a cover letter outlining your motivations and fit with the profile to recruiting@coosha.org.

About COOSHA Impact Venture

COOSHA is a mission-driven start-up based in Leuven, dedicated to solving one of the world's most pressing challenges—Clean Cooking. With operations in Belgium, Namibia, Rwanda, and Uganda, COOSHA leverages innovation and impact-focused solutions to drive meaningful change in global communities.

If you're ready to make a tangible impact in a start-up environment and help shape the future of clean energy solutions, we'd love to hear from you!
